```java
import java.awt.*;

1.  public class text_ex{
2.     public static void main(String[] args) {
3.             Frame f = new Frame("Text Field example");
4.
5.             TextField t1,t2;
6.
7.             t1 = new TextField("Enter Username");
8.             t1.setBounds(50,100,200,30);
9.             t2 = new TextField("Enter Password");
10.            t2.setBounds(50,150,200,30);
11.
12.            f.add(t1);
13.            f.add(t2);
14.
15.            f.setSize(400,400);
16.            f.setLayout(null);
17.            f.setVisible(true);
18.    }
19. }
20.
```
