```java
import java.awt.*;
public class Button_ex{
        public static void main(String[] args) {
                Frame f = new Frame("Button Example");

                Button b = new Button("This is Button");

                b.setBounds(50,100,80,30);

                f.add(b);

                f.setSize(400,400);
                f.setLayout(null);
                f.setVisible(true);
        }
}
```
